Super Smash Gear.. An oddity among bullet hells in which the player can gather a huge armada of higly specialized, highly disposable kamikaze ships. Hitogata Happa's mechanics inspire in me a wild ambivalence. It is absurd, demanding, and masochistic in ways that no other shooter would dare. This game brings so many gimmicks to the table along with such a relentless difficulty that at first pass it seems like some kind of sick joke, but I can't help but feel a certain fondness for its vaulting imagination. In between the whimsical dolls named after tea leaves and the massive German flying machines there's a mechanically tight game with plenty of heart that just begs to be replayed again and again. After all, success really comes down to bringing the proper tool for the job, and knowing how to use it.
. I am pleased with the quality to price ratio of this game. Not a good introduction to the tower defense genre, but as a veteran I find that it is enjoyable. The difficulty from map to map varies significantly, and because of the co-op option I highly recommend you buy a friend a copy at the same time. The GUI has been criticized a great deal, but I don't have a problem with it. Be sure to watch the tutorials in their entirety, it is worth the wait. I give it a solid 7 or 8 out of 10.. I got stuck in a corner and couldn't get out. The hands don't move either so it's a pain figuring out how to move or manipulate things.. but apparently with the Rift you have to hold down the teleport button.. I hate teleporting in VR games.. now I have to use to it pick things up. what?. Who plays these 2D platform brawlers in the age of Battle Royale?
The concept is ok tho. You choose between a few animal characters, select from roles (loadouts) from ninja to mad scientists and play on 8 different maps with up to 4 players. It's F2P and you can share one keyboard for 2 players to do the achievements (local coop).

Could not even get past the first real level out of sheer absolute boredom.

slightly buggy as well - double clicks aren't always registered, "use gamepad" kept turning back on the options, the tutorial level's blue tint is so blue that you can't tell the gem colors apart, and it crashes when exiting the game.

. It's simply fun and enjoyable platforming indie game. Levels are nicely designed aswell as straight forward riddles, and animations. The only bad things about it is that Mimpi is making such a painful sound upon death it might be displeasing to hear, call PETA... Other than that short but good game.. Never added the promised split screen co-op that I gave them money for. Failure to follow through on promises is never a good sign.. ouch, oof, my feelings, oof.

+Monster girls cute.
+I have 7 daughters now.
+Easy to get a hang of, and if you have trouble still, there's a guide book you can click on whenever.
+Multiple endings, but you have pretty good control on which ending you get. (meaning: you don't get screwed up and can't go back, unless you get a "bad end".)

-You kill the monster girls. :(or. well. not I guess. if you want to.
-Kinda short. I enjoyed it though, so, I guess I don't mind. It only took me about 7 hours to beat with some extra endings. I'm not a full completion kind of person, but I think if I wanted to get all the stuff it might take a few more hours only.
-Sometimes the things you do feel tedious.
-Would have liked to know about the villagers a bit more. A little was added with the DLC but, eh.

tips:
~If you don't like repetitive things, this game might not be for you.
~Make at least two save files. One for doing the true end, and one for doing the extra endings.
~The game warns you, but there are dark themes in this game, so if you don't think you can handle it, maybe it's not for you..
Very well-made game! Imagine Marble Blast mixed with Unreal Tournament stuffed into a sumo-ring... This is a recipe for competitive fun, especially if you love aim-heavy arena shooters such as Quake, CS:GO, and UT. Although this game is in Early Access and has a small player-base, it is worth a buy and giving it a try. The developers are HIGHLY active and aspire to continue to greaten the game, unlike other fun games that showed promise, but lacked a devoted dev team.
This game wants YOU! If you are poor and don't want to pay for it, then hopefully you read this and copy&paste this steam gift key... Enjoy! ;D
